capabilities, we identify new business and technology trends and develop solutions to help clients around the world

Implementation Delivery service

Implementation

VESL currently adopts a mix of Oracle Unified Method (OUM) and Application Implementation Method (AIM) methodologies coined as VESL Rapid Prototype Methodology (VRPM) when carrying out Oracle E-Business Suite implementation projects

VRPM is Oracle's proven implementation method, defining the procedures, standards, and tools for Oracle projects and programs. It has been developed by experienced field practitioners from VESL.

VRPM, VESL hybrid methodology moulded to the specificities and constraints of Africa and adapted as per project needs. VRPM provides a full life-cycle, service-integration method for Consulting. This method standardizes, integrates, and optimizes lines of business from strategic planning to production support.

VESL's Oracle E-Business Suite implementations covers all modules and provides services such as multi-platform core implementation, customizations, product extensions, data conversion and integration with third party products.

Migration, Upgrade and Cloning

VESL leverages its VPRM methodology to ensure quicker go-live and better return on investments on Oracle EBS upgrade and migration projects. Our approach help to minimize risk while at the same time allow for detailed cutover planning with minimal business disruption. Our services include: Oracle EBS Version and Release upgrades, Platform independent migration, re-implementation and ERP Data migration, Application and Database cloning, Oracle Database Migration and Upgrade.

Optimization and Recovery

VESL advocates running Oracle's E-Business Suite and Oracle engineered systems as this provide better business results, greater business value for financial, operational, supply-chain, human resources and customer information teams. VESL offers services such as Database Recovery, Installation and configuration of Oracle Data Appliances and Oracle Exadata, Database Optimizations.

Governance and Compliance

VESL carries out Oracle Governance, Risk and Compliance regulatory activities for Oracle E-Business Suite implementations and upgrade projects.

Functional and Technical Training

VESL delivers functional and technical trainings on all Oracle E-Business Suite modules. Trainings are delivered by certified Oracle University Trainers. Trainings are delivered at our modern office training facility. Trainings are offered to corporate bodies, individuals and key users after successful Oracle EBS Implementation.

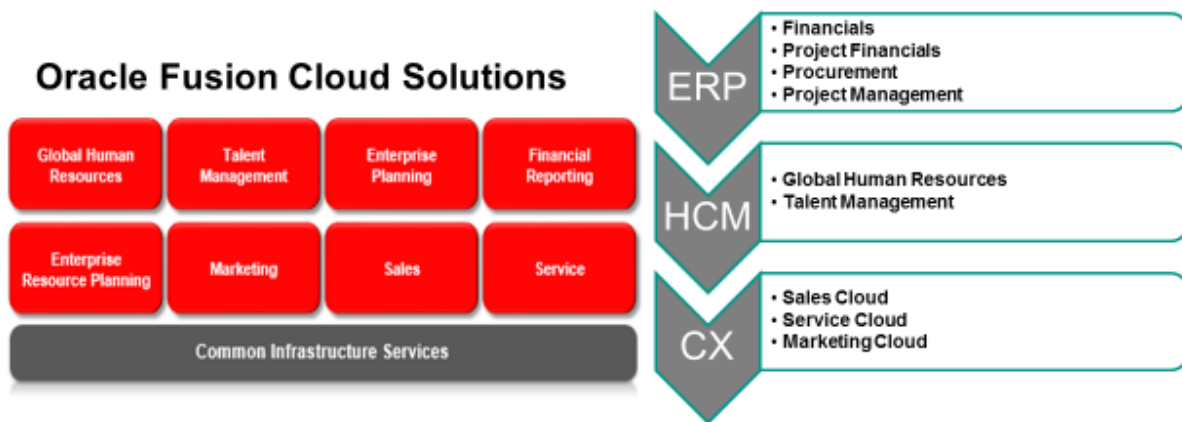

Cloud Integration and Reporting

VESL offers cloud integration services for customers intending to integrate on premise EBS solutions with Oracle Cloud Fusion, Oracle SOA Suite and Oracle Taleo. It includes using custom integration, Oracle E-Business Suite Adapter as required by clients.

With the emergence of Cloud solutions for Enterprises VESL has equipped itself with knowledge, skills and training in implementation services for Cloud based applications such as Oracle fusion cloud as showed below :
